

Logan Orchard and Market (LOAM)

**35 acres of Logan Triangle can't be built on but can be farmed.
Fruit and nut trees can produce healthy food on contaminated soil.**

**This food can be given to hungry neighbors,
preserved for winter, or sold in farmers' markets.**

Neighbors can be employed to plant, prune, harvest, process, sell.

**Several thousand trees and berry bushes would surround a community
center where neighbors learn related green job skills:
weatherization, solar tools, bicycle repair, deconstruction, microfinance.**
